Dogs (of all shapes and sizes)
The sharing economy (CC: Uber)
Hackathons

Experience

CCIS Fellow at **Northeastern University**
September 2017 - Present
• Mentor incoming class of CCIS students through weekly class meetings and one-on-one talks
• Assist course instructor with lesson preparation, presentation, and grading
• Chosen from a competitive pool of candidates for this position

Designer at **Scout Studio**
January 2016 - Present
• Design various high fidelity web pages for different projects using Sketch and Invision
• Develop Scout's visual identity through marketing collateral including posters, videos, and animations in Illustrator and Premiere Pro

Software Engineer Intern at **John Hancock**
January 2017 - June 2017
• Created user-centered internal facing apps to increase company productivity, using agile development practices.
• Collaborated with designers and developers to fix bugs, implement feedback, and polish designs across multiple projects
• Learned about web development frameworks including Angular2, React, and implemented them in both short and long term projects.

Projects

Email Signature Tool
January 2017 - February 2017
• Created a front-end app that generates a user's email signature based on given input, written in Typescript/Angular 2
• Provided internal consistency to 500+ employees through formatting and user-centered design

Scout Site
January 2016 - May 2016
• Collaborated on a five person team of designers and developers to redesign Scout studio's website
• Utilized an agile sprint-based schedule and weekly critiques to give feedback and make improvements

Hello LA (Hack@Brown)
February 2016
• Created a web-based local's guide to Los Angeles on team of designers and developers
• Co-designed the UI, UX, and brand identity of the site in a 24 hour deadline
• ***Project won overall best user experience out of 100 teams***
